**STATE OF MONTANA
BIENNIAL REPORT OF
DEPARTMENT OF STATE LANDS AND INVESTMENTS**

Helena, Montana, October 1, 1966

To His Excellency, The Governor, and
Members of the Fortieth Legislative
Assembly of the State of Montana.

In accordance with Section 81-206, Revised Codes of Montana, 1947, I herewith submit the Biennial Report of the Department of State Lands and Investments for the period July 1, 1964, through June 30, 1966. The report contains an account of all moneys received from all sources during the period, and the distribution thereof to the appropriate funds. The report shows what disposition has been made of the lands originally granted to the State of Montana, as well as the income therefrom. Also included are comparative statements showing the growth in income of this department since 1896.

Respectfully submitted,
MONS L. TEIGEN
Commissioner of State Lands and Investments

OFFICERS OF DEPARTMENTS OF STATE LANDS AND INVESTMENTS FROM JULY 1, 1927 TO JUNE 30, 1966

GENERAL INFORMATION

The Congress of the United States by the Enabling Act approved February 22, 1889, granted to the State of Montana, for common school support, sections sixteen and thirty-six in every township within the State. Some of these sections had been homesteaded, some were included within the boundaries of Indian reservations, others were otherwise disposed of prior to the passage of the Enabling Act. To make up for this loss, and in lieu thereof, other lands were selected by the State. In addition to the common school, the Act, and subsequent Acts, granted acreage for other educational and state institutions. It further provided that all lands granted thereunder could only be disposed of at Public Auction after proper advertising.

All moneys received from the sale of these land constitute Permanent Funds as provided for in the Enabling Act (except lands granted for public buildings). Rentals received from land leases, interest on deferred payments on lands sold, interest on funds derived from land sales and invested in specified securities and all other actual income is made available for the maintenance and support of the public schools and other land grant institutions.

LAND GRANT FUNDS

The Enabling Act specifically provided that all moneys received from the sale of lands belonging to the common school grant, and the other grants heretofore mentioned, together with proceeds from the sale of timber, oil royalties and other minerals should be credited to a permanent fund for each of the land grant institutions. It also provided that permanent funds cannot be used for any other purpose and must forever remain inviolate as the property of each of the land grant funds. The Constitution has limited the investment of these funds to the purchase of general obligation bonds, such as School District, County and Municipal bonds, within the State of Montana, Bonds of the State of Montana or United States Government Bonds. The interest received on such investments is distributed annually with other income to the respective land grant institutions.

The records in this department reflect a growing demand for land and a considerable acreage has been sold from all the land grants in the past. It is interesting to note the increase in permanent funds for each of the land grants from the sale of surface acreage, timber, and mineral royalties.

We give you the following information showing the original grant, the acreage remaining and the fund for each grant as of June 30, 1966:

Fund	Original Grant	Acreage as of June 30, 1966	Fund as of June 30, 1966
Public School.....	5,188,000	4,601,102.14	\$44,977,027.85
State University.....	46,720	18,161.54	739,938.27
(University of Montana)			
Montana State College—Morrill Grant.....	90,000	63,257.31	1,173,385.31
(Montana State University)			
Montana State College—Second Grant.....	50,000	32,408.31	457,970.02
(Montana State University)			
School of Mines.....	100,000	59,633.22	1,093,228.25
(School of Mineral Science & Technology)			
State Normal School.....	100,000	63,050.00	1,024,333.64
Deaf and Blind Asylum.....	50,000	36,235.86	493,355.80

"Militia Camp" now used as an Agricultural Experiment Station.....	640	640.00	-----
Agricultural and Manual Training School.....	5,000	2,000.00	-----
State Penitentiary.....	9.75	9.75	-----

PUBLIC BUILDINGS GRANT

The Enabling Act placed no restrictions or limitations on the Public Buildings Grant and no Permanent Fund is involved for this grant. All moneys realized from the sale of lands, interest on sales contracts, grazing rentals, agricultural crop share returns, sale of timber and oil royalties are disbursed as they accumulate on improvements to the Capitol Buildings and new construction as needs may require. A considerable acreage of the Capitol or Public Buildings grant is classified as timber land which is managed by the State Forester on a sustained yield basis. The value of the timber sold from this grant during the past two years amounted to \$274,538.52.

As of June 30, 1966 the balance in the Public Buildings Fund with the State Auditor was \$72,338.81.

INTEREST AND INCOME

Interest and Income is defined as the money received for the use of State lands and the permanent funds arising therefrom. This money includes grazing rentals, crop shares, oil lease rentals, interest on land contracts and interest on investments. Before distribution is made of moneys allocated to Public Schools, the law requires that 5% of the total annual income be deducted and credited to the Permanent Fund for Public Schools. Thereafter the Superintendent of Public Instruction divides such income among the counties of the State on the basis of children therein of school age. The County Superintendent of Schools of each county further divides the amount received among the school districts of the county on the same basis. This distribution in 1965 amounted to \$23.87245 per child and in 1966 the amount per child was \$22.881938. Similar income from the other grants is likewise made available as received monthly to assist in defraying operating expenses of the other institutions.

TOTAL ACREAGE OF STATE LAND IN SCHOOL AND INSTITUTION ACCOUNTS, INCLUDING LAND UNDER CONTRACT TO PURCHASE ACREAGE BY CLASSIFICATION

June 30, 1966

Grazing (including 17,864.79 acres of timber land)	4,181,136.42	
Agricultural land under cultivation	487,972.01	
Timber (including 17,864.79 acres of grazing land)	478,724.30	
Lands under Certificate of Purchase	192,345.35	
Special Grants (See UNSOLD LAND ACCOUNT Table)	7,592.71	
TOTAL ACREAGE	5,347,770.79	
Less duplication of timber land	17,864.79	
TOTAL NET ACREAGE		5,329,906.00
Unsold land account, June 30, 1966	5,137,560.65	
Plus land under Certificate of Purchase	192,345.35	
TOTAL NET ACREAGE, JUNE 30, 1966		5,329,906.00

TOTAL INCOME FROM GRAZING AND AGRICULTURE—ALL FUNDS

	FISCAL YEAR ENDING June 30, 1965	FISCAL YEAR ENDING June 30, 1966
Agriculture	\$1,832,928.33	\$2,096,261.69
Grazing	959,502.65	934,413.79

GROSS INCOME

Gross income includes all money received by this Department for the use of lands remaining in all the grants made to the State of Montana under the Enabling Act. This does not include Permanent Funds. Of all receipts classified as interest and income, approximately 90% belongs to the public schools of the State. Since these funds accumulate over a period of one year, and remain with the State Treasurer until the month of March before distribution to the schools, every effort is made to keep as much as possible invested in short term U. S. Government securities. The amount invested is in excess of \$4,000,000.00 annually and the interest earned thereon is a substantial addition to the amount to be distributed.

TOTAL RECEIPTS FROM ALL SOURCES

The total receipts received from all sources by this Department vary according to crop conditions, the sliding scale grazing rental and the fluctuation interest rate on investments. Little land was sold so income from land sales has declined. The total income includes moneys received from crop shares on approximately 480,000 acres leased for agriculture, grazing rentals, oil lease rentals, royalties, payments on land sales and outstanding land contracts, interest on deferred payments on such contracts together with interest on bond investments. This income is from all land grant funds. We list the annual income from all sources over a period of ten years to show the volume of business transacted by this department.

1957 total receipts	\$6,865,112.33
1958 total receipts	6,376,590.06
1959 total receipts	7,037,782.95
1960 total receipts	8,593,786.39
1961 total receipts	7,826,312.61
1962 total receipts	6,733,027.00
1963 total receipts	8,389,809.13
1964 total receipts	8,654,623.99
1965 total receipts	8,385,694.79
1966 total receipts	8,192,369.24

UNIFORM PLAN FOR INVESTING FUNDS OF THE STATE OF MONTANA STATE DEPARTMENTS, AGENCIES AND INSTITUTIONS

The Land Board for many years has supervised the investment of Permanent Funds belonging to the common school and other State Institutions. In 1953 the Legislative Assembly enacted what is termed a unified investment plan for all State Departments. This law requires the State Board of Land Commissioners to supervise the investment of surplus funds belonging to the Montana Highway Patrol, Hail Insurance Department, Public Employees Retirement Fund, Industrial Accident Reserve Fund, Teachers Retirement Fund and funds belonging to the Fish and Game Department.

FIELD DEPARTMENT

In view of the widespread activities of the field department it is deemed advisable to expand somewhat on some of the duties and problems in connection with their work. The re-appraisal of State lands as to grazing capacity is a continuing function of this department as it must be done at least once during the term of each ten-year lease. Basically, the job entails a physical examination of the land itself by a deputy field agent at which time the vegetative characteristics are noted, the long-term grazing capacity is estimated, a plat is prepared showing physical detail and areas of crop production. At this time, needed range and cultural practices are noted and, if necessary, called to the attention of the lessee. Due to the fact that, in most cases, State land is widely dispersed over the State, much travel is involved in doing this work. The field staff is composed of five men, experienced and trained in many phases of land management and are in a position to advise as to practices that will be profitable to the lessee and the State as well and in turn provide for the perpetuation of the land resource. Whenever abuse of State land is found the lessee's attention is called to the situation and if corrective action is not taken immediately the matter is referred to the State Board of Land Commissioners for possible cancellation as provided by law.

During the past biennium, re-appraisals have been completed for the following counties in accordance with the above:

Beaverhead	Daniels	Powder River
Broadwater	Fallon	Prairie
Carbon	McCone	Sweetgrass
Carter	Park	Wibaux

There is presently under cultivation over 480,000 acres of State land. This land is leased on a crop share basis providing a minimum of $\frac{1}{4}$ of all crops raised to be remitted to the State. As a result of this arrangement the State of Montana is considered a producer as defined under the Federal Agricultural Act. Although almost 2,000 farmers lease land from the State on this basis, the State as a producer must elect to either comply with the program or remain out of the program. As the implications of the program do not affect each individual farmer uniformly, it is sometimes found to be to the individual farmer's advantage to remain out of the program; although for the most part State lessees choose to remain in the program. During calendar 1965 a few operators elected to remain out of the program and several county ASC committees refused to grant a waiver of the offsetting compliance requirement to the State in these instances. As a result of this it was necessary that their decision be appealed to the State ASC committee which resulted in a delay in distribution of farm program payments due the State of Montana for that year. Upon a favorable ruling by the State committee in April, 1966, the payments were authorized to be made which will increase the amount received during 1966 by \$364,000.00. It is hoped that hereafter it will be possible to expedite this procedure in order that the payments earned will be available for distribution at the end of the year. Supervision of this program requires close surveillance of all leases and cooperation with the ASC offices.

As income from agricultural lands is closely tied to crops grown and weather conditions, each tract of agricultural land is inspected just prior to harvest. This makes it possible for the department to obtain an estimate of crop conditions and anticipated income. In order to accomplish this task, additional temporary field agents are employed. Since the inception of this program in 1951 the department has been able to provide more supervision of farm leases, the result being an increase in production from State-owned cropland.

The State law provides that all leases be issued on the basis of competitive bidding and grazing leases on which bids have not been made must be leased at the minimum rental according to the formula adopted by the 1963 Legislature. This called for an animal unit month rental of 32¢ plus two times the average price per pound of beef cattle on the farm in Montana for the previous year. The rental so established is further increased 10¢ per animal unit month for better than the average

quality State land and reduced 10¢ per animal unit month for poorer than average quality. The fee so established in 1966 was 58¢, 68¢ and 78¢. The following table indicates the return from grazing leases and the base fee for each year since the law was enacted; however, it should be made clear that the total rental collected includes the rental from competitive bid leases as well as those on which the formula applies:

TABLE NO. I
TOTAL GRAZING RENTALS AND ANIMAL UNIT FEE

1964	A. 20 head and above 86¢; B. 15 thru 19 head 76¢; C. 14 head and under 66¢;	Total \$1,025,049.96
1965	A. 20 head and above 80¢; B. 15 thru 19 head 70¢; C. 14 head and under 60¢;	Total \$959,502.65
1966	A. 20 head and above 78¢; B. 15 thru 19 head 68¢; C. 14 head and under 58¢;	Total \$912,711.32

PUBLIC LAND LAW REVIEW COMMISSION

The Eighty-eighth Congress enacted several pieces of significant legislation involving public lands. One of these of tremendous importance to the State of Montana was Public Law No. 88-606. This will allow for a review of the public land laws and the regulations incident thereto by a commission composed of both Congressional and lay persons, assisted by a twenty-five member advisory council representing various interests and liaison representatives from each of the states. The State Land Commissioner was appointed to serve as Montana's representative to this Commission.

The Federal Government owns some 770,000,000 acres of land and of this 27,645,553 acres is located in Montana, comprising 29% of the total land area of our State. To administer these lands we are told that there are more than 5,000 individual land laws on the U. S. statute books at this time. Many of these laws were created to fulfill a specific need which need no longer exists and their mere existence tends to complicate sound administration. The Western States with their large areas of Federally owned lands within their boundaries are extremely interested in this study and will be called upon to provide information and specific proposals in need of review to the commission. In order to properly represent the State's interest in connection with the work of the commission, the Governor appointed an advisory group to advise and recommend matters of concern to their varied interests. Due to the fact that the commission was created subsequent to the last session of the Legislature, there were no moneys appropriated to defray the expenses of either this committee or the Governor's representative. In view of the far-reaching implications of this study it is recommended that sufficient funds be appropriated to defray these expenses. Montana's participation in this endeavour is a must even though it may not be possible to revise Federal laws and procedures to the advantage of the State; the mere fact that there is such a study in progress would warrant the State's participation in order that its particular public land problems can be aired before the Commission.

ISLANDS

The department is continuing its study of the ownership of islands in navigable streams throughout the State although such work must be done on a piecemeal basis. It is believed that a considerable acreage is owned by the State in this category although it can not be leased or sold until the islands have been studied and claimed for the State. This would proceed faster if additional funds were available to conduct a detailed survey; however, in the absence of specific funds allocated for this purpose, we must proceed in this manner.

LIEU SELECTIONS

The Department is presently engaged in selecting the remaining acreage due the State of Montana under the original Public School Grant. The remaining acreage unselected is primarily many fractional acreages and some tracts located in unsurveyed areas. The original Grant totaled 5,188,000 acres of which there is approximately 30,000 acres remaining unsatisfied. The Public Domain land available for selection is widely scattered and to balance similar type Public Domain land against the type lost to the State is a slow process under the Acts of Congress.

INVESTMENTS

The Constitutional restrictions placed upon investments for the Montana Trust and Legacy Fund should be removed. As a result of these restrictions, the fund has actually failed to grow in purchasing power as it should have. Admittedly, funds invested in Government securities are fully guaranteed and funds invested in equities are not; however, our economy has made an impressive demonstration of its ability to weather unstabilizing events over the past thirty years. Furthermore, it should be pointed out that downward trends in the market are not as serious for institutional funds such as the Trust and Legacy, in view of its long term nature, as the same type of activity creates with the private Investor.

At the time the Constitution was written, investments in the business community were viewed with some misgiving and Government securities were looked upon as the only properly safe investment for sacred trust funds. Experience in the past few decades has demonstrated the fallacy of this assumption when we find the fund growing but the beneficiaries receiving less than they might in constant dollars of purchasing power. Due to these limitations the Trust and Legacy Fund has been unable to even achieve the rate of return on investments that other State funds have. The Retirement Funds, for example, in their experience with Government guaranteed mortgages and corporate utility bonds have shown that some broadened authority, even without investing in equities, allows for diversification and provides the fund manager alternative investment opportunities which can increase the return.

A proposal was made before the last session of Legislature to submit to the electors of the State an amendment to Section 3, Article XI, and the repeal of Section 8, Article XXI, of the Constitution in order to allow broadened investment authority to be set by law. Although this failed to gain favorable consideration by the Assembly, it is suggested that the matter be reconsidered by the Fortieth Legislative Session. It is also suggested that upon favorable action by the Legislature and the electors, action be taken by the Legislature, in session at that time, setting forth investment criteria and providing for effective administration.

MINERAL

The department has experienced increasing interest in mineral development during the past bienium. A notable example of this is the interest in sub-bituminous and lignite coal deposits in southeastern Montana. In view of this interest the Land Board has rewritten the coal lease form to incorporate certain provisions deemed necessary for strip mining operations. Some of the changes were: a graduated rental and royalty scale, depending upon the age of the lease, the nature of the coal deposit and the type of mining carried on. In addition, the lease called for restoration of the surface following mining operations within the concept of best beneficial use which will be determined by the department in cooperation with the Montana Bureau of Mines and Geology. It is believed that this is sufficient to protect the state's interest insofar as State land is concerned.

With respect to oil and gas leasing the Board has adopted a policy of offering, on their own motion, unleased State lands for oil and gas leasing at the quarterly lease auctions. Previously, only those tracts applied for were offered, and since embarking on this new procedure, 21,807 additional acres have been leased for \$35,696.00, or an average of \$1.60 per acre for the first year of the lease. These are tracts that would have probably gone unleased had we not called them to the attention of the industry in this fashion.

RECOMMENDATIONS

In order to more effectively discharge the duties of this office the following recommendations are submitted for consideration by your office and the 40th Legislative Assembly:

1. The Thirty-ninth Legislative Assembly acted to broaden authority of the Land Board to exchange lands with the Federal Government. It has been found, however, that the restrictions placed upon exchanges as found in Section 81-304, effectively preclude making such exchanges. It is recommended that the Legislature consider removing the six section limitation as to total area to be exchanged in any one year and also remove the requirement that both tracts of land be situated in the same county. Another feature that has been found objectionable is the requirement that present lessees or permittees must be recognized for the continuance of their use by each party to the exchange.
2. Due to the increasing interest in the development of lignite and sub-bituminous coal located in eastern Montana it is recommended that Section 81-502, RCM 1947, be amended to provide that coal leases be issued for a twenty-year term with provision for the renewal to be established by the State Board of Land Commissioners.

TABLE NO. IV

TABLE NO. IX
RIGHT OF WAY DEEDS TO STATE LANDS
JULY 1, 1964 TO JUNE 30, 1966
D-5142 TO D-5426 INCLUSIVE

Purpose of Right of Way	Number	Acres	Compensation	Fees
State highways, borrow pits, forest, county and private roads	137	1,057.43	\$ 55,756.86	\$ 685.00
Oil and gas pipe lines, power, telephone and telegraph lines	93	347.83	11,634.20	465.00
Small voltage electrification power lines	11	10.51	151.52	55.00
Microwave and substation sites and airport and Government facilities	26	196.97	4,834.86	130.00
Fish and Game public recreation and wildlife conservation and public buildings	3	51.28	1,226.50	15.00
Dams, irrigation ditches and City water systems	13	36.54	2,631.90	65.00
Railroads	2	16.14	403.50	10.00
TOTALS	285	1,716.70	\$ 76,639.34	\$1,425.00

Compensation is credited to the land grant from which the acreage was taken.

A percentage of the charge for right of way across land under C.P. is applied to the contract.

All fees are credited to the general fund for the State of Montana.
